

WORKFLOW AUTOMATION CONSULTING GROUP

WHO WE ARE

We are a faculty-led in-house consulting service comprised of high achieving student consultants specializing in workflow automation.

Each consultant is hand-selected for their academic excellence, professional maturity, and technical acumen.

Through requirements gathering and solution design, we deliver high-impact results under the direct supervision of experienced faculty.

WHAT WE DO

We develop targeted software solutions designed to eliminate administrative bottlenecks. If your department or organization relies on repetitive manual tasks, we can help streamline and automate your workflow.

REPRESENTATIVE ENGAGEMENTS

- Consolidating fragmented data into streamlined month-end reports.
- Creating automated email notifications based on specific data thresholds.
- Developing custom reports based on external web data.
- Consolidating multiple spreadsheets into a single, comprehensive report.
- Systematizing and cleaning large data sets for better decision-making and contact management.
- Deconstructing complex manual workflows and rebuilding them as efficient digital processes.
