

Course Outline of Record (COR)

Instruction Guide

Georgian College's [Course Outline Search \(COR\)](#) provides detailed course information about the courses with our programs. Course Outlines can be retrieved in this tool typing in the course code or keyword search along with the appropriate effective term.

1. Use the search panel on the left and enter the course code (subject code + course number) or select from the list of subject codes (not both).

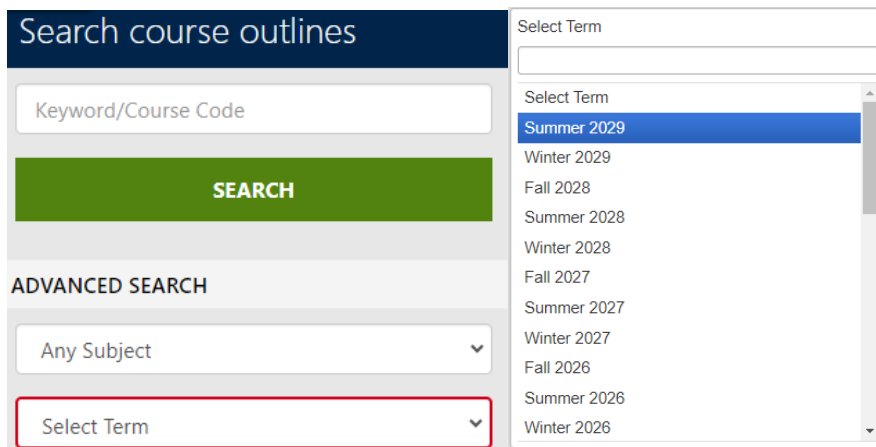

Search course outlines

Keyword/Course Code

SEARCH

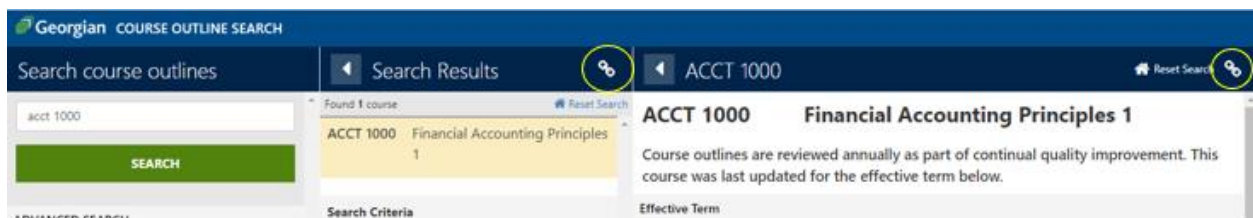

2. Select the term you wish to view (the term the course was taken or will be taken) and click search to find the course of interest using the drop-down box.

Course outlines are not updated every term, so the date on the outline may be older than the term you have searched. The course outline was last updated for the effective term listed on the outline.

How to Get a Course Outline Link to Share

Please use one of the link functions in the header (circled in yellow) after you have selected an outline. This will generate a link that can be used to link to Blackboard to COR or to be shared with others.

The url includes the Banner term code that will match the selected effective term in COR. In this example this is Winter 2024.
