

Good Reads by CTL...

"This book is a game-changer for anyone looking to up their presentation game. Duarte shows how storytelling and visuals can really hook your audience and make your message stick. The tips she shares are practical and relatable, helping you turn your ideas into engaging experiences. If you want to present in a way that truly resonates, this book is definitely worth a read!"

"This is a post-pandemic follow up to the best-selling *The Tipping Point*. Gladwell's amazing storytelling explores how ideas and social movements form. This one is easy to get lost in and comes up often in conversations long after you've finished it. Pro-tip: It's especially good if you listen to him read it in audio format!"
Please note this book is available online on Georgian's library website.

"Get our students thinking in math and problem solving and move away from mimicking. Four toolboxes of steps towards building a thinking classroom. (Pilot in progress - see EngTech/CTL)"
Please note this book is available online on Georgian's library website.

"A fascinating dive into cognitive psychology and how we learn. It provides insights on effective teaching strategies backed by research."

"If you ever feel that digital technology is all-consuming or a kind of white noise you cannot get rid of, then you might appreciate this read. Author, Cal Newport, explores what a life with minimal digital input looks like and what can be gained from new approaches to living and working in a simpler way -- with and without your digital environment."

"A classic read that even if already enjoyed, is worth revisiting. Gladwell's writing is easy and engaging and his musings in this book focus on the power of "little things making a big difference". It's an invitation to consider alternative perspectives, and provides insight into how change happens. It's a great read for those in education who are looking for new ways to reach and interact with their students."
